

## **Co-Enrollment Information**

(per Student Progression Plan for the Calhoun County School District)

### **"M. Adult School Credit**

1. A student needing 8 credits for graduation may attend adult school, upon the approval of the principal and guidance counselor. The student may enroll in the Adult School Program, beyond the regular school day and earn 1 credit that will apply toward graduation requirements for the current academic year. Additionally, a senior who, at the end of the first semester, needs 1/2 credit to meet the requirement for graduation, may attend Adult School and make up the needed 1/2 credit, if approved by the principal and guidance counselor.
2. At the discretion of the principal and guidance counselor, out-of-district transfer students may be allowed to earn additional credits due to incompatibility of scheduled curriculum offerings."

### **Afternoon Class Attendance Information:**

"Seat time requirement": Students that are co-enrolled (enrolled both at their local high school and at the Adult School for the purposes above) have a "seat-time" requirement. This means that students must be in class the following number of hours and complete the academic work as specified by the course code description of the course as interpreted by the teacher: 135 clock hours for a full credit course and 67 1/2 clock hours for a half credit course.

Students are not allowed to attend afternoon classes for more than two and a half (2 1/2) hours per day if they attend a full school day.

If there are extenuating circumstances that leave a student a few hours shy after their academic requirements are complete, there may be ways for students to complete hours outside of the classroom if documentation is provided and pre-approved. This is if and only if other attendance requirements are met.
